2. Claims being examined are still 1-21.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1, 2, 4-11, 16-19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (US 6,184,312) in view of Fuhr et al (US 5,658,974).
5. Claims 3 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (US 6,184,312) in view of Fuhr et al (US 5,658,974) as applied to claims 1 and 18 resp. above, and further in view of JP 58,076,447 (Abstract in English).
6. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (US 6,184,312) in view of Fuhr et al (US 5,658,974) as applied to claim 1 above, and further in view of Wittmann et al (US 5,030,675).
7. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (US 6,184,312) in view of Fuhr et al (US 5,658,974) as applied to claim 1 above, and further in view of Umeda et al (US 5,449,710).
8. Claim 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (US 6,184,312) in view of Fuhr et al (US 5,658,974 as applied to claim 1 above, and further in view of Choi et al (US 5,087,521) or Narushima et al (US 3,948,836).

Please refer to prior Office actions for substance of these rejections.

9. Applicant's arguments filed on April 26, 2004 have been fully considered but they are not persuasive.

Art Unit: ~~1616~~ 1711

On page 2 (of above response) the applicant's arguments that "siloxane of Fuhr is broader than that of Yamamoto" and that "siloxanes of Fuhr may not be as effective as flame-retardants etc. etc" are not persuasive. Fuhr is a secondary reference relied upon for its teaching of phosphorus compounds for imparting flame retardancy. It is therefore immaterial whether other ingredients of Fuhr's composition such are siloxanes are same as or different from those of Yamamoto's composition. Fuhr's compositions do not have to be directed to any optical components

Applicant's statement (on same page) that "there is no way to predict if the same synergism will exist between the phosphoric esters of Fuhr and siloxanes of Yamamoto, (as that which exists between phosphoric esters of Fuhr and siloxanes of Fuhr)" seems to be based only on assumption/s. There is no validity for such a statement unless established by some experimental data. Contrary to what the applicant infers, the examiner is of the opinion that, unless proved otherwise, one of ordinary skill in the art will be motivated to use phosphoric esters of Fuhr in the composition of Yamamoto, without any risk of losing the beneficial qualities of composition of Yamamoto but on the contrary with the expectation of gaining few additional benefits.

Prior art therefore renders instant claims prima facie obvious.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1616 \7\1\

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
